

SUMMARY

Engineering leader with 20 years of experience building consumer products and platforms. Built and managed teams from 10 to 60 engineers at Netflix, Google, Opower, and earlier startups. Open-source contributor and creator of Dozzle.

EXPERIENCE

Netflix

Los Gatos, CA

Engineering Manager, Merchandising Experiences & Games Discovery

May 2024 - Present

- Lead two teams of 20 engineers building Netflix's merchandising surfaces and games discovery experiences, shipping over 100 A/B tests.
- Set a 3+ year strategy for Netflix's operator tools, reimagining how campaigns run across games, live events, video streaming, and other domains.
- Reshaped team charter from platform development to deprecating legacy merchandising systems in favor of the new platform, unblocking the next wave of operator tooling.
- Launched a self-serve campaign platform that lets merchandising operators target audiences, draft creative, and deploy promotions without engineering involvement. Over 500 campaigns shipped in 2025.
- Bridged Netflix's personalization platform with business-driven promotion needs, balancing algorithmic recommendations with operator-led merchandising to surface the right content to members.
- Owned hiring across the org. Rewrote the interview rubric and process, raising the bar on senior engineering and manager hires.

Google

Mountain View, CA

Engineering Manager for Assistant Auto Growth team

2022 - 2024

- Managed multiple teams to target and activate new and at-risk assistant users with ML. Using proactive suggestions on voice plate and notifications on mobile to increase DAU by 5%.
- Introduced just in time voice consent with a redesigned onboarding on Google cars which led to improving permission opt-in by 10%.
- Launched remote setup for iOS and Android which enabled users to setup their profile and permissions. Currently being launched with GM and other OEMs.
- Set product strategy for 2023 and 2024 for Growth team. Working with product managers and designers to define the roadmap and objective key results.

Google

Mountain View, CA

Technical Lead Manager for Google Ads Internal CRM

2019 - 2022

- Led the frontend team for Google Ads internal CRM to build an online intelligence platform for sellers to increase their productivity and revenue with an ML recommendation engine.
- Owned the annual roadmap planning for 20+ engineers and 3 product managers on forecasting and setting quotas across all of ads sales.
- Launched an alerting system for sales managers to track anomalies in their portfolio by comparing across other verticals.
- Created an educational product tour using simple ML models which recommended features not used by sales managers to improve their productivity.
- Led the technical architecture on the frontend team to improve developer happiness and engineering excellence, optimizing latency and application uptime.

Ujet.co*Engineering Director*

San Francisco, CA

2018 - 2019

- Grew the team to 15 engineers across three tech leads covering SRE, Server & API design, and ML.
- Moved a monolithic Rails application to micro-services by introducing Go, scaling to 3,750 qps.
- Owned UJET's security roadmap. Architected and launched an authentication platform integrating OpenAuth, Auth0, and Okta with an internal JWT implementation across their SOA.
- Introduced Apache Kafka, Elasticsearch, and Logstash to power a real-time analytical reporting engine in Go behind UJET's customer-facing dashboards.

Capital One*Engineering Director*

San Francisco, CA

2017 - 2018

- Technology leader for the labs and innovation teams in SF. Managed a team of 20 engineers with two managers.
- Pitched and built a content management system to power all of Capital One's promotion modules on mobile devices. Tracked user engagement over time for data analytics and customer retention in Apache Spark.
- Migrated all internal micro-services to Docker on AWS EKS with 99.9% uptime built on Java, Go and Python.
- Product owner for all Capital One cryptocurrency products. Integrated their wallet app with Coinbase, Chain.io and other smart contract providers. Launched an internal blockchain platform which is still used across all business platform teams.

Quid, Inc*Engineering Director*

San Francisco, CA

2016 - 2017

- Led web and mobile engineering for an AI visualization platform serving Fortune 500 companies, including a Docker migration to OpenShift in production.

Opower (acquired by Oracle)*Engineering Director*

San Francisco, CA

2011 - 2016

- Engineering lead for email, paper reports, and all digital communications with six engineering managers as direct reports and 60 ICs.
- Delivered a four-year product roadmap for outbound communications, sending paper and digital reports to 50+ million households per week.
- Delivered a 16x throughput improvement to the internal communication platform, working directly with the CTO and VP of engineering on architecture.
- Planned and executed a process in which engineers self-selected into their scrum teams, resulting in 90% overall happiness across all engineering teams.
